TabTec® CR

Consumer Friendly Child-Resistant Desiccated Container Closure System

TabTec® CR is the new standard for safe and reliable drug product dosing in a convenient and easy-to-carry package.

Designed using decades of injection molding and moisture management experience, TabTec® CR is ideal for a wide range of oral solid dose products where chemical and physical stability are of concern.

Technical details

Size

- Length = 83.3 mm
- Height = 42 mm
- Width = 22.8 mm
- Nominal fill volume = 30 cc/ml
- Pouring assist = 12 mm

- Molecular sieve
- Activated carbon
- Blends thereof

Regulatory / Quality

- Certified acc. to PPPA 16CFR Part 1700 & ISO 8317/2015
- DMF file #29415
- Materials = PP top, LDPE bottom

TabTec® CR has been designed to run on existing bottle filling lines, saving you money by reducing the number of:

1. Packaging components sourced and
2. Packaging line unit operations (increasing OEE%)

Innovative Stand out from the crowd!

- Improve user experience
- Patented CR closure
- Look and feel of innovative design resonates with patients and consumers
- Easy and intuitive reclosing
- Integrated desiccant
- Custom colors available

Safe Safety and efficacy first!

- Reliable child safety function, from the first tablet to the last
- Extended product shelf life through integrated desiccant
- Moisture and odor protection
- Hygienic and simple dosing
- No loose desiccant in package
- No loose cap or closure due to Flip Top design

Convenient On-the-go packaging!

- Slim, rounded shape allows discrete carrying in any pocket or purse
- Easy “to-go” packaging improves accessibility and use of products for self-care and chronic medical treatment regimens
- Package shape allows large label applications improving readability of key product information
